Riding gear safety rules and recommendations

You and your passengers are required to wear an approved life jacket certified for use with a personal watercraft.

Wearing a neoprene wetsuit or bottom will provide adequate protection to the lower part of the body, unlike normal swimwear. You can suffer severe internal injuries if water is forced into a lower body cavity as a result of falling in the water or being near the jet thrust nozzle.

Finally, extra protective equipment such as footwear, gloves and goggles is also recommended.

You can find all of these items at an authorized Sea-Doo dealer or online at sea-doo.com. Sea-Doo Accessories

How to measure

For best results, have someone else take measurements. Measure body in swimsuit or undergarments. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

Chest • Measure under your arms, around the fullest part of your chest.

Waist • Measure around your waist at the narrowest place.

Hips • Stand with legs together, measure around the fullest part of your hips, ensuring the tape is level.

Arm Length • Let your arms hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

Inseam • Without shoes, from crotch to the floor.

ONGENUINE PARTS

With Sea-Doo parts, you get the peace-of-mind of a **full one year warranty**. That's whether they're installed by you or your authorized BRP dealer. And if they're installed by your dealer, labor is covered too.

Maintenance

Choose from products designed to make regular maintenance easy and keep your watercraft at its best.

Did you know...

- ✓ We recommend doing an oil change every year at preseason or after every 100 hours of use, whichever comes first. This will help increase the longevity of your vehicle.
- Over time, engine oil breaks down and wears out, making it less effective at lubricating critical engine components and absorbing friction heat.
- ✓ Plus, our ultra-convenient oil change kits already include the right parts and the right amount of oil based on your vehicle's maintenance needs. Taking care of your Sea-Doo has never been easier.

420956123

✓ Changing your oil as recommended is a practice you'll value for a long time.

Post-Riding

The last step before putting the cover on, post-ride maintenance will extend the life of your watercraft over the long run.

- Mixed with water, it washes away the salt and leaves a protective coating on the surface to prevent rust and corrosion.
- · Can also be used for trailer wash and maintenance.

Sacrificial Anodes

- Sacrificial anodes are specifically designed to protect parts of your personal watercraft that are underwater from galvanic corrosion.
- Like the name implies, they essentially "sacrifice" themselves by absorbing the electrochemical process of corrosion to prevent metal components like the impeller, jet pump nozzle or engine from being "eaten away" instead.
- Galvanic corrosion can cause major damage if not controlled.
- · Inspect your sacrificial anode at least once a month.
- · Replace it when it is 50% depleted.
